who we are

gomic technology consulting is part of a network of independent Zoho partners with diverse experience in a number of industries, including technology, healthcare, education, financial services, consumer goods, construction, manufacturing, and non-profit. As official members of the Consulting Partner Program, we have been vetted and approved by Zoho Corp to advise customers and implement solutions.

**Authorized
Partner**

We are vetted and approved.

Many organizations have been over-sold on technology. We helped a community non-profit save \$58k over 3 years simply by eliminating redundant software.

\$58k

When we heard that a boutique manufacturer of durable signage was handling their process on paper, we knew we could improve their productivity in a big way!

+27%

By implementing a convenient, no-touch onboarding and account management process, we helped a subscription-based startup reduce member turnover.

our work process

A Data Mapping

To keep everyone on the same page, we typically begin an engagement with a current-state map of your business processes and data flow, and we work with you to find and prioritize both pain points and opportunities.

B Iterative Improvement

There are always quick wins: the fixes today that make tomorrow better. Rather than trying to boil the ocean, we deliver fast, incremental improvements, reacting to your needs and to business conditions.

C Results-based Testing

Standard integration testing confirms that two pieces of software talk to each other effectively. We go further, engaging our clients to make sure that our deployments improve their KPIs and their workday.

You should be out growing your business.

Let us show you how good support can pay for itself in reduced costs and increased effectiveness.

what our clients say

"Rick cared about our development and put the time in to help us improve. It was so motivating and refreshing."

—Meily
Comp

"Work was comfortable and productive, and we were able to build our tech systems at an affordable price!"

—Marisol T.
Director

"Having a solid infrastructure to scale the business has proven to be exactly what we needed. I'm so impressed!"

—Jesse C.
Owner

"Considering we caught a big oversight before launch, service ended up more affordable than I thought! So glad I reached out."

—Adrean W.
Educator

"The best IT guy in the business! He takes the time to understand how his work helps your work."

—Erik D.
Program Manager

Implementing CRM?

Whether you're new to CRM or simply looking to get more out of your current system, there are definitely some common pitfalls to avoid. Check out our 8 Tips for a Successful Implementation.

Email marketing problems?

The world is inundated with SPAM, most of which you never see thanks to the coordinated efforts to control it. But those very safeguards can get your business into trouble if you don't follow best practices.

Wanna get paid faster?

One client saw a whopping 40% decrease in outstanding invoices after implementing an electronic payment option. For that, you'll need to choose a payment processor. Start by reading our free guide.

Are you ready for AI?

Forget the hype. The reality is that most small and medium-sized businesses don't have a system that AI could plug in to, meaning they're already a year or two behind. Prepare your business for the revolution.
